for your little sidekicks
- when they need it most.

SCOPE

Supporting growing families for 40 years

In 1985, while owning & running Freyne's Pharmacy, Garrett Freyne recognised the need for a multivitamin for children at a time when nutritious foods weren't always accessible.

Partnering with UCD and an Irish manufacturer, he developed Vivioptal Junior - Ireland's first multivitamin tonic for children aged 1-12. Now rebranded as VIVIO® Junior, it remains a trusted family staple, passed down through generations.

Today, under Scope (founded by Tom and John Freyne), the updated formula includes 12 essential vitamins, zinc, and iodine to support growth, immunity, and cognitive development - just as it always has, with a modern twist.

We're so grateful to have you on this journey. Thank you for supporting VIVIO® Junior - and for helping us celebrate 40 wonderful years.
